## About me

Most known as vie10. 16 y.o.

I'm an Idealist person who targets high level in the things works with. I love programming – no limits, you can be better always. I got a lot of knowledges while working with different peoples from all the world on open-source projects and not only. I always open to new mets and experience exchanges. I love to study things that I can use in practice.

Also I'm a stubborn person. Therefore all the things I starts should be finished. I never drop something before try a lot of different ways and ideas. I like improve things i can.

I prefer practice to theory – not without but not only.

Active, cheerful and motivated to engage time with a team for joint achievements.

I've started programming in Java and switch to Kotlin later.

## Experience

### **FREELANCE**

Not too much. Not too little. If you would like I tell you more myself on the meet.

### **LOOKS LIKE A GOOD PLACE FOR YOUR COMPANY**

Doesn't it sounds like an appeal?

## Education

I've secondary education from a Ukrainian school.

## Skills

In the latest 2 years I'm actively learning programming and all the things related to. Java and Kotlin (JVM, JS) is the languages with I'm feel comfortably.

English level: Limited working proficiency.

Testing: (Most likely Java or Kotlin if needed) JUnit5, Mockito, (Kotlin) Kotest, Mockk.

Dependency injection: Kodein, Koin.

REST-API: Ktor Server, Kotlinx Serialization.

REST-API Implementation: OkHttp, Retrofit2, GSON, Jackson, Ktor Client, Kotlinx Serialization.

VCS: Git.

Build automation: Gradle (Groovy and Kotlin DSL).

Web-development: Kotlin/JS (React + MUI).

Multithreading: Kotlin Coroutines (Core), Java Concurrency (Core).

Data: Ktorm, SQL.

Android: Activity, Fragment.

OS: Windows (Advanced user), Linux (Advanced user), OSX (Advanced user).

IDE: IntelliJ IDEA Ultimate.
